I am excited to learn about the Software Engineer Intern position and would greatly appreciate your considering my placement in this role. I've closely reviewed the needs and requirements for this role and believe that my qualification have prepared me to contribute immediate value to your organization. My main aim for this position is I want to learn as much as I can to improve my coding skills and implement them in real life to help people and I am very confident that the experienced team can provide me that mentorship.

While in college, I worked hard to hone my Coding Skills. I am focused and attentive to detail when addressing high-volume task loads to meet deadlines. I am inspired by making a positive impact by applying skills and my problem-solving abilities allow me to address challenges to achieve results.

I look forward to speaking with you regarding my skill set and attributes which I believe will serve as an asset to support company goals. Please take a moment to review my attached CV. Thank you for your time and consideration.
